Julie:

Nice talking with you yesterday. We are planning a public Seattle Town Hall Meeting followed by a Washington Sea Grant Symposium on Ocean Acidification in the Puget Sound-Washington Coast region on 8-9 November (see attached brochures). We have a lot of interesting new results from this region that we think you will be interested to hear about. We are seeking your help to get the message out to our many colleagues about these important events. I am hoping that you can give us the names and contact information of persons in the EPA that you think would be interested to participate in these two events.

You are most welcome to join us at these exciting events.

Best regards,

Richard Feely
